DETAILED ACTION

1. The RCE that submitted on 05/02/05 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1, 3-4 and 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by JP05-002385.

Regarding claims 1 and 9-13, JP05-002385, figures 1-2, disclose a connector for connecting circuit boards with each other, comprising:

- a first connector section (1) disposed on a first circuit board (8) and having contact terminals electrically connected to an electro-conductive layer of the first circuit board; and
- a second connector section (1) disposed on a second circuit board (8) and having terminals electrically connected to an electro-conductive layer of the second circuit board;

wherein when the first connector section is coupled to the second connector section, non-elastic metallic engaging portions (side edge of an engagement hole 4) provided in the first connector section are latched with elastic metallic projections (7) provided on an inner surface of an elastic piece (6) provided in the second connector section to hold the

Application/Control Number: 10/619,489

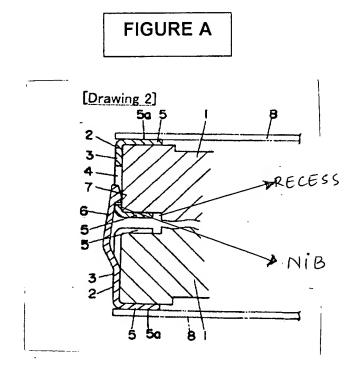

Art Unit: 2839

first connector section on the second connector section, the engaging portions in the first and the second connector sections are nibs (a figure A below) and projections of a metallic holding fixture, respectively, the first connector section having leg portions (5) fixed to the first circuit board and the second connector section having leg portions (5) fixed to the second circuit board, and a recess (the figure A below) is formed for allowing a portion (5) being engaged in the second connector section to advance/retract at a base of the second connector section.

Regarding claim 3, the metallic holding fixture is formed in a thin sheet-like form separately from the base for supporting the contact terminals in the second connector section.

Regarding claim 4, the metallic holding fixture having legs (5) fixed to the second printed circuit board.

Regarding claims 7 and 8, the engaging portions of the first connector section are embedded in one piece and fixed in the base of the first connector section.

Application/Control Number: 10/619,489

Response to Arguments

Page 4

4. Applicant's arguments with respect to claims 1 and 9-11 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

- 5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh-Tam T. Le whose telephone number is 571-272-2094. The examiner can normally be reached on 7:30-5:00.
- 6. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TC Patel can be reached on 571-272-2098. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
- 7. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
